

CMSC 125 ST-8L Project

Sedit – Simple Text Editor

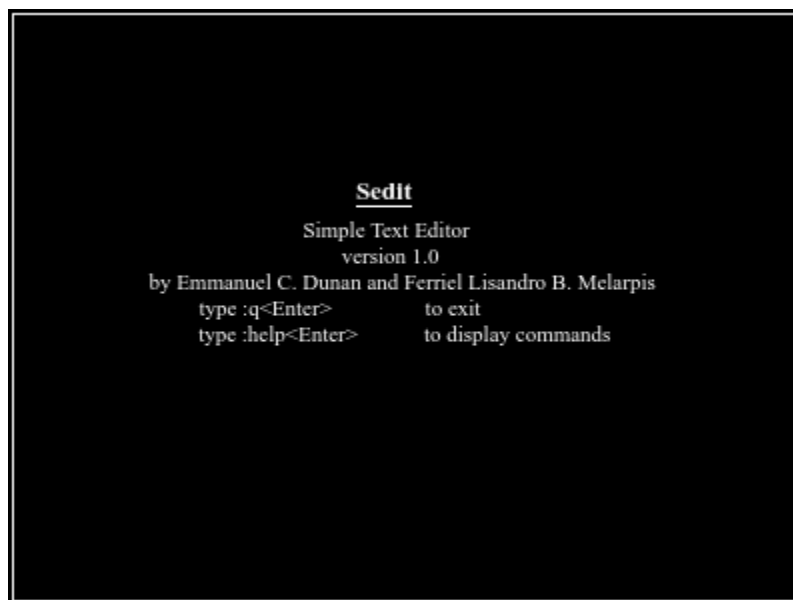

Project designed by Emmanuel C. Dunan and Ferriel Lisandro B. Melarpis
Institute of Computer Science
University of the Philippines Los Banos

Project Description :

The goal of this project is to create a simple terminal text editor for the ICS-OS.

Project Scope and Limitations :

1. Sedit can edit any number of files.
2. It has two modes : command mode and edit mode.
3. The default mode is command mode which is a vi-like input mode where in the keys you typed will be considered as a command if they are otherwise nothing is done.
4. The edit mode allows the user to edit any kind of text file.
5. Sedit has a few syntax highlighting for C, C++ and Java programming language.
6. Sedit has fixed tab width which is four characters wide.
7. To save a file, the user needs to enter command mode by pressing ESC key from edit mode.
8. Sedit has a help command for displaying the available commands and their descriptions.

```
Sedit
Simple Text Editor
version 1.0
by Emmanuel C. Dunan and Ferriel Lisandro B. Melarpis
type :q<Enter>      to exit
type :help<Enter>   to display commands
```
