Exercise 9: Singly Linked List

Prepared by: RNC Recario
rncrecario@gmail.com
Institute of Computer Science UPLB
Feb 2012

Download the file named `u01_exer9_recario.c` . Simple task: fill up the missing codes. Add the nodes at the end of the list, delete node from the head.

Note: If deemed necessary, you can declare and use other variables but **do not** declare them GLOBALLY!

Once done, DO NOT forget to:
- o FULLY document your work!
- o Change the filename to appropriate name!!! Filename is
  `<section>_exer9_<lastname>.c`
- o Send to your lab instructor's email OR follow the submission guideline stated for this exercise!

PS: STUDENTS WHO CHEAT WILL AUTOMATICALLY RECEIVE A GRADE OF 5.0.

Enjoy! ☺
